SOFIA NAUSHAD

PYTHON DEVELOPER | BACKEND & FULL-STACK ENGINEERING | GENERATIVE AI

Shillong, India | +91 9263406133 | sofianaushad055@gmail.com

GitHub: github.com/sofia516 | LinkedIn: linkedin.com/in/sofia-naushad-coder02

PROFESSIONAL SUMMARY

Computer Science graduate (2026) with hands-on experience building Python backend services, full-stack applications, and LLM-powered tools. Built an asynchronous FastAPI URL-auditing service that reduced average response time from 512 ms to 58 ms, a full-stack CRM with an AI agent, a JWT-secured lead-management platform, and a local RAG assistant for 8+ PDFs. Skilled in Python, FastAPI, REST APIs, SQL, PostgreSQL, React, LangChain, LangGraph, FAISS, testing, and Git-based workflows.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, SQL

Backend & APIs: FastAPI, Flask, REST APIs, SQLAlchemy, HTTPX, asynchronous programming, JSON

Frontend: React.js, HTML, CSS, Streamlit

AI / Generative AI: LLMs, Generative AI, RAG, LangChain, LangGraph, Hugging Face embeddings, FAISS, MMR retrieval, Ollama, Groq API

Databases & Tools: PostgreSQL, SQLite, Git, GitHub, GitHub Actions, Pytest

Computer Science: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Languages: English, Hindi

SELECTED PROJECTS

Page Pulse — Asynchronous URL Auditing API

Python, FastAPI, HTTPX, Pytest, GitHub Actions | Apr–Jun 2026

- Built an asynchronous API that audits public URLs and returns HTTP status, response time, content type/length, and page title.
- Reduced average response time from 512 ms to 58 ms (~89%) using TTL caching, HTTP connection reuse, and concurrency limiting.
- Added per-client rate limiting, structured JSON logging, request-ID tracing, and automated Pytest checks in GitHub Actions CI.

Code: github.com/sofia516/page-pulse

AI-HCP CRM — Full-Stack CRM with AI Assistant

React, FastAPI, PostgreSQL, SQLAlchemy, LangGraph, Groq | Jun–Jul 2026

- Built a full-stack CRM with six REST endpoints for healthcare-professional profile and interaction management.
- Integrated a LangGraph agent using Groq to route natural-language requests to backend tools, keeping AI orchestration separate from core CRM logic.

Live demo: https://ai-hcp-crm-chi.vercel.app

LeadFlow — Full-Stack Lead Management Platform

React, FastAPI, PostgreSQL, JWT, REST APIs, SQLAlchemy | Jul 2026

- Built a sales workflow application that manages leads from public capture through Won/Lost stages.
- Implemented JWT authentication and Admin/Sales Member role-based access control across frontend and backend.
- Added lead assignment, pipeline status, notes, activity history, search, filtering, and pagination; deployed with PostgreSQL on Render.

Live demo: https://leadflow-woua.onrender.com

PDF RAG Assistant — Conversational Q&A; over Documents

Python, LangChain, Hugging Face Embeddings, FAISS, Ollama, Streamlit | Jun–Jul 2026

- Built an end-to-end RAG pipeline with semantic retrieval and MMR to answer questions across 8+ PDFs.
- Ran Llama 3.2 3B locally through Ollama, avoiding paid inference APIs; added multi-document upload, chat history, and page-level source citations.

Code: github.com/sofia516/RAG-PDF

AirwayScope — Computer Vision Research Prototype

Python, MediaPipe Face Mesh, OpenCV, Streamlit, SQLite

- Built a prototype that detects facial landmarks from a photograph, applies pixel-to-millimetre calibration, and calculates five airway-relevant facial measurements.
- Added measurement-quality warnings and optional SQLite/CSV record handling. Research prototype; not clinically validated.

Code: github.com/sofia516/airwayscope

XAI Dashboard — Explainable AI Web Application

Python, Streamlit, PyTorch, SHAP, Grad-CAM | Jul 2026

- Built an interactive explainability dashboard for image classification using Grad-CAM and tabular/NLP model interpretation using SHAP.
- Designed a modular structure to support additional model types.

PROFESSIONAL EXPERIENCE

Web Development Intern

Mills Motors Pvt. Ltd. | Delhi | Jul–Sep 2025

- Developed three responsive web pages—a company portfolio, car listing and inquiry system, and dealership landing page—using HTML, CSS, and JavaScript as part of a four-person team.
- Resolved 5–10 frontend bugs and UI/UX issues through debugging and Git-tracked changes.

Business Development Associate Intern

AiVerbalyze Technologies Pvt. Ltd. | Oct–Dec 2025

- Completed a business development internship at a technology company.

EDUCATION

B.Tech, Computer Science & Engineering: Vivekananda College of Technology and Management (AKTU), Aligarh, Uttar Pradesh | 2022–2026 | GPA: 7.1/10

Higher Secondary (Class XII): Kendriya Vidyalaya, Shillong, Meghalaya | 2021–2022 | 80%

CERTIFICATIONS

- Agile Project Management Foundation — HP (Apr 2025)
- Data Science & Analytics — HP LIFE (Apr 2025)
- Frontend Development Certification — OneRoadmap (May 2025)

RESEARCH PUBLICATION

“Adaptive Intelligent Virtual Assistant (AIVA)” — Co-author with K. Khan, P. Sharma, and T. Kafeel. International Journal of Innovative Research in Technology (IJIRT), Vol. 12, Issue 11, April 2026; Paper ID: IJIRT198381. Co-authored a conceptual paper on a context-aware virtual assistant architecture integrating machine learning, NLP, and behavioral analysis.

ACHIEVEMENTS

- Co-organized college coding-club hackathons and workshops for 100+ participants.
- Participated in Kaggle Playground Series S6E9 (EV purchase prediction).
- Improved Page Pulse average API response time by approximately 89% (512 ms to 58 ms).
